

How to Delete Temporary Internet Files and Cookies from Internet Explorer Versions 6 & 7

Internet Explorer version 7 (for Internet Explorer version 6 see the section below).

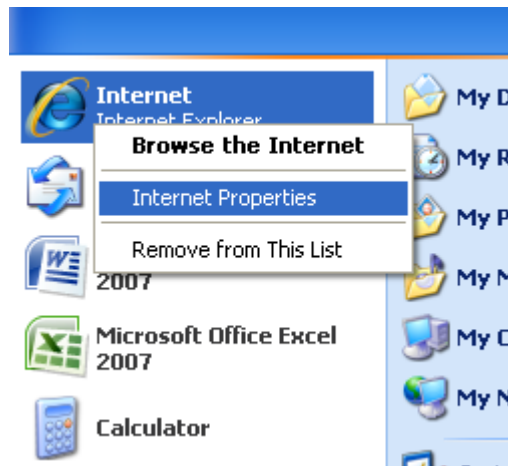

Please print this document before continuing. Internet Explorer and all applications must be closed before continuing.

Open the Start Menu

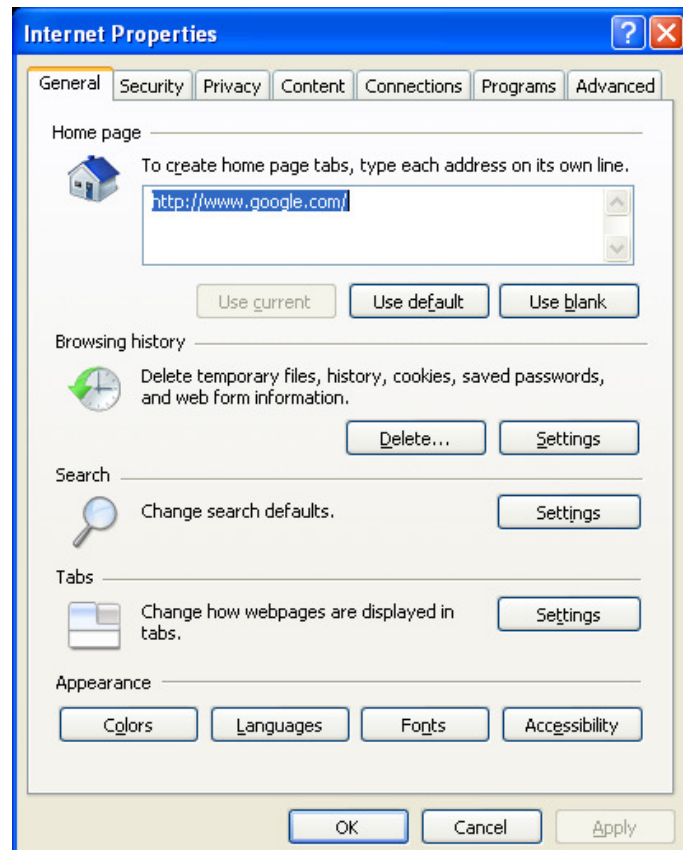

Right Click Internet

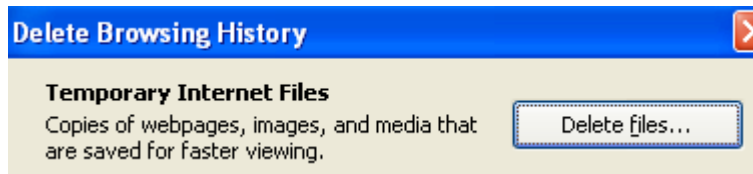

From the popup menu select Internet Properties

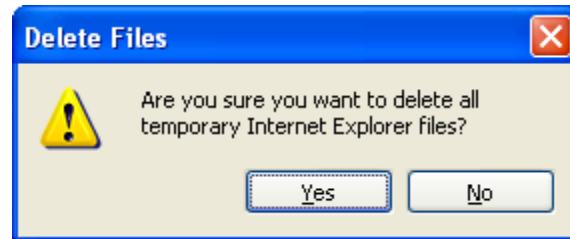

In the Browsing history section click the Delete Button

In the Temporary Internet Files section click Delete files

Click Yes

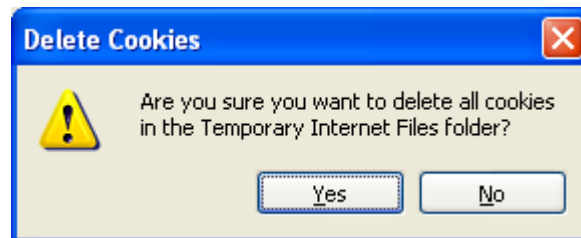

If there a lot of temporary internet files stored on your computers hard drive this may take a while.

In the Cookies section click Delete cookies

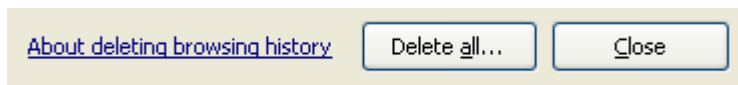

Click Yes

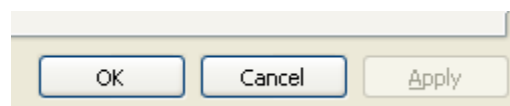

If there a lot of cookies stored on your computers hard drive this may take a while.

Click the Close button

On the Internet Properties page click the OK Button

Your Internet Cache files and Cookies are now deleted. Open Internet Explorer and go to <http://webmail.discoverlimu.com> to access your webmail.
